

Abstract
~~ABSTRACT~~ of the Disclosure

Method for generating a group of page files formatted in a page markup language

5

10

When drawing up a hierarchically structured document in an author file AT, a reference to a data record of a file already stored in the authoring system can be generated. The author file is sub-classified into individual data records which are respectively stored as pages on an Internet server. The added reference is converted into an HTML page address.
